INTRODUCTION

Reel Tek Consulting is a duly registered limited liability company involved in consultancy services at executive and managerial capacity, business and entrepreneurship skills development, information technology and telecommunication, engineering projects, supplies and general contracting works. The head offices is located in Abuja Federal Capital Territory with other partner offices in Kaduna, Lokoja and Lagos.

The company was incorporated in 2011 with the aim of providing business solutions and value added services in all spheres of the economy. In pursuance of this goal we made collaborative agreements with several local and foreign companies. We also have special concessions with diverse range of suppliers which give us the advantage of getting qualitative products and services. We are aided with a pool of highly experienced and certified consultants, trainers, engineers entrepreneurs and management experts, whose principle aim is to solve complex problems relating to human existence and comfort.

More so, our long term partnership with Nigeria Employers' Consultative Association NECA, Industrial Training Fund ITF, National Board for Technical Education NBTE and the International Labour Organization ILO in areas of technical, business and entrepreneurship Skills Development in Nigeria is another good strength we like to share.

OUR VISION

To maintain and strengthen our core engineering businesses and other human empowerment strategies by developing new skills and activities while responding to the changing needs of clients and market both locally and internationally.

OUR MISSION

- To execute our jobs in the shortest possible time while adhering to the highest standard
- To offer the most cost effective and sustainable solutions to our clients
- To work based on mutually beneficial partnership with our clients and communities we are working in.

OUR CORE VALUE

A system of shared beliefs that are at the heart of what we do.

Customer first: We exist to serve our customers. Our success will be determined by how well we relate with our customers.

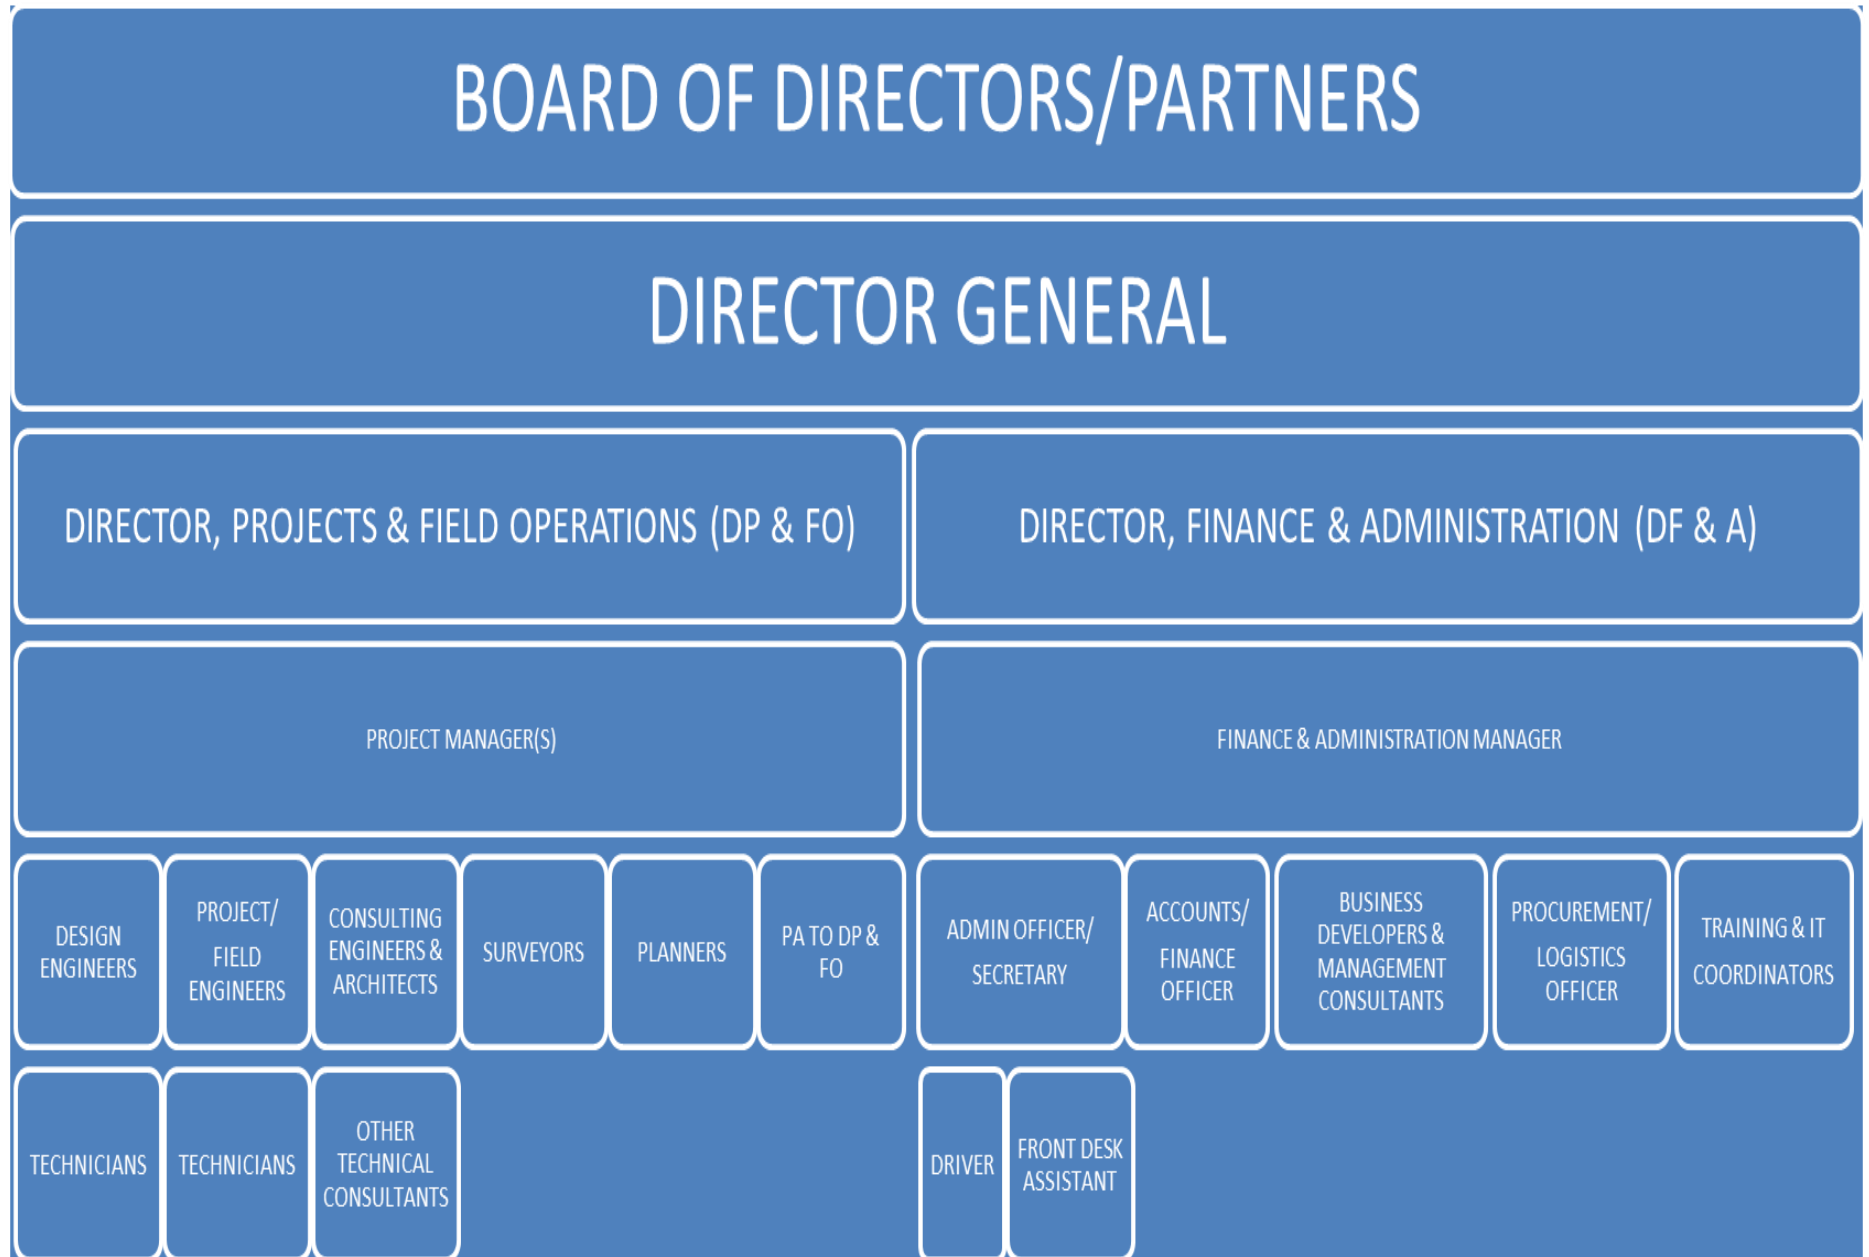

Innovation: We are intuitive, curious, inventive, practical and bold, which allows us to create new ideas for our customers, our business and employees. These ideas come from anywhere throughout our global operations.

Teamwork: We work based on team spirit philosophy. Success requires teamwork. We are collaborative and respect the contribution of each person to the team's success.

Respect: We are a global company with many cultures. We respect and embrace people and perspectives from all over the world.

Accountability: We do what we say we will do. We own a collective responsibility towards customers, colleagues, communities and shareholders.

OUR ORGANIZATION STRUCTURE

OUR SERVICES

1, CONSULTANCY SERVICES:

We offer distinctive/innovative researches in technical, business, financial, academic/educational and information technology spheres to a wide range of clientele, using our proactive, dynamic, experienced and highly qualified professionals with proven integrity to provide professional solutions to identified problems.

Our specialist and functional groups jointly or independently, advice clients on almost any functional area. This could be areas related to business/technical skills development, economic empowerment, business development, finance, marketing, computer systems or operations, rural electrification, engineering works and the likes.

We are in a position to provide global solutions in Nigeria and Africa at large, through our own offices and network of strategic alliances in the USA, Europe, Middle East, South Africa, Australia and South East Asia. Our concept started with a team of management and financial experts who reasoned and decided to put their experience together to assist and find solutions to the economic challenges facing not only Nigeria but also the entire world.

2, HUMAN RESOURCE MANAGEMENT AND TRAINING:

Our **Human Resource** HR service covers recruitment, staff training and deployment which we tailor to meet specific organizational needs.

We deploy our skills and expertise in HR activities and initiatives to help organizations increase their productivity through better use of their human resources and to enable client companies achieve real competitive advantages. Our interviewing, background checking, reference checking as well as

integrity tests techniques along with our objective assessment process provide us with the basis for minimizing many of the risks inherent in selection.

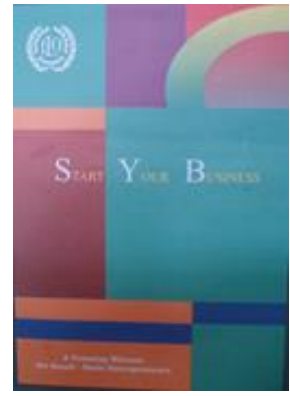

Our **training** services are based on needs identified, then work with clients to provide innovative solutions. A few of this include (not limited to):

a) Use of the International Labour

Organization ILO Entrepreneurship

Training modules for existing & potential entrepreneurs such as students, pre-

retirement staff, unemployed graduates and the likes, to either develop a workable business plan or set up structures that ensure business sustainability.

b) Automobile and Mechatronics training modules such as auto; electrical/electronic spray painting, welding, Panel beating and diagnosis.

Auto fault diagnosis and repairs

Auto spray painting (using spray cabin)

c) Computer and ICT training modules

d) Project management training modules

and many more.

As business consultants, we listen to clients, identify the staff training needs, develop appropriate modules and contents then engage in training the staff in order to update and upgrade their working skills. A continuous follow up and evaluations afterwards ensures system efficiency and productivity.

3, ENGINEERING PROJECTS:

We also carry out all our engineering works using right standard, tools and workforce. A few of these include:

a) Water works

Dredging, drilling boreholes, dam construction and installation of overhead tanks and water reservoir, construction and installation of irrigation facilities, structural water works, pipeline design and fitting, geographical and hydraulic conductivity studies, aquifer analysis, borehole development, pump test, installation and maintenance works, flood control and routing, water analysis etc.

The borehole drilling operation is affected in stages viz:

Stage 1: Geological survey. The initial step is to undertake a geological survey to determine the depth of the aquifer, good drinking water and long lasting one. This is the feasibility work which will

reveal the water level and rock basement which will enable us achieve a perfect work.

Stage 2: We drill between 35-100 meters depending on the geographical survey report showing the water level and basement rock. The basement rock does not pose much challenge as we have the needed set of equipment to ensure success of the exercise.

Stage 3: Drilling. Casting, development and installation, etc.

Stage 4: Mechanical and plumbing work, DPC waste piping, water supply, channel piping, connections at input and out nut pipes. Fixing of all sanitary fittings, etc.

b) Civil Engineering works

Construction has been one of the essences of Reel Tek Consulting Limited business.

With our office headquarter in Abuja FCT and operations/project office in Lokoja, Kogi State; RTCL and its partners have been able to carry out various civil/building

engineering in virtually all the 36 states of Nigeria. We have the resources and knowledge to undertake any job, anywhere, with unmatched expertise. We are familiar with construction regulations and labor laws in Nigeria, and we have a proven record of working smoothly with government agencies and labor organizations.

Over the years, we have created many innovative construction techniques, some of which have become industry standards and we have foreign partner who are highly experienced in the construction industry.

Reel Tek Consulting Limited is a premier leader in designing, developing, managing, and constructing civil infrastructures. We have a wealth of experience in road construction and maintenance; from rural road construction to construction of rural-urban highway

systems. Reel Tek Consulting Limited builds the infrastructure necessary to improve quality of life and sustain economic growth.

Design and Construction of Debt Management Office in Lokoja, Kogi State

Construction has been part of our business for over some years now. Our services on construction of building are based on specialized expertise. The works performed are Residential building construction, Commercial building construction, underground construction, harbour construction, construction of sports facilities, and the construction of streets, roads, bridges and Calvert facilities. Reel Tek Consulting Limited has developed some of the best processes and technologies in the industry, through the application of modern civil engineering techniques and assuring quality results

while meeting tight schedules on the most challenging projects. Our years of experience coupled with our manpower have made Reel Tek Consulting Limited a name to reckon with in Nigeria civil engineering industry.

As engineering project manager and consultant, a few of the project designed and supervise in Kogi State include:

1. Design and construction of presidential lodge in Kogi state government house, Lokoja. Kogi state.
2. Design and construction of block of office in Ministry of Works, Lokoja. Kogi state.
3. Re-design and renovation of Kogi FM radio transmitter house, Mount Patti, Lokoja. Kogi state.
4. Design and construction of Graphic Newspaper administrative office and fence, Lokoja. Kogi state.
5. Reconstruction of government house mosque, Lokoja. Kogi state.
6. And many more.

c). Mechanical engineering works

At RTCL we provide contract based mechanical design and engineering services to our clients for their products and processes. Our extensive knowledge of materials and manufacturing methods coupled with our deep supplier network allow us to deliver both prototypes and small production runs with exceptional speed and economy.

d). Solar Systems

Reel Tek Consulting Limited and its partners have a strong technical support from the Institute of

China Electric Technology Corporation (CETC). Their New Energy Business Department is engaged in design, development, manufacture, sales about high-quality PV module and its application. They mostly focus on research and developing of highly efficient PV module, solar home power system, and on/off-grid solar power system.

Our services on solar systems are as follows:

* Solar off-grid power system, Solar wind hybrid system, Solar thermal water heating, Solar water pumping systems, Solar refrigerators and freezers, Solar mobile and laptop chargers, Solar system components: such as Solar Panels, Solar Batteries, Solar Inverters, Solar Charge Controllers, and Solar Accessories.

4, GENERAL SUPPLY:

General Supply Reel Tek Consulting Limited also engages in good service delivery and mega marketing approach. That is getting things done at the right time, to the right people with reasonable cost. This is achievable through the team work of professionals of integrity embedded in the company. Over the years, Reel Tek Consulting Limited's procurement unit has met the challenges of national

supply demands by providing efficient supply and delivery solutions to its clients under a single point of contact and responsibility.

The procurement unit has both international and local partners of more than 15 procurement professionals, located in permanent offices in 10 countries around the world, this inform the reason why we are always able and capable of meeting our clients need.
